

Guest Speakers

2nd Annual EGLR-ASPRS Dinner Meeting

8:00PM: "EGLR History"

Bob Brinkman

Senior Vice President of Woolpert, Inc.

Bob currently serves as a Project Director for Woolpert, Inc. of Dayton, OH and has 37 years' experience working in the fields of Photogrammetry, Surveying, and Remote Sensing. Throughout the years Bob has served on various ASPRS technical committees and from January 2004 to January 2008 Bob served on the EGLR Board of Directors.

Bob is a Certified Photogrammetrist and a registered Professional Surveyor and Mapper and has served as project director for Woolpert's work as a prime contractor supporting the NOAA Shoreline Mapping Program, the USGS Geospatial Services Program, and the Ohio Statewide Imagery Program. He is currently in "semi-retirement" and serves Project Director for the work Woolpert performs as a subcontractor under the NGA Global Geospatial Intelligence (GGI) Program.

8:30PM: "Pittsburgh from the Air"

Darryl Ford Williams

Vice President of Content for WQED Multimedia

Darryl Ford Williams is the VP of Content for WQED Multimedia responsible for television, radio, Interactive & Education. She oversees the creation, development, production, and delivery of all new and existing local, national, international, and syndicated programming on all media platforms for WQED.

She has extensive background as a television news producer and news manager including responsibilities as managing site producer for CBS News in its coverage of September 11 at the Pennsylvania crash site of United Flight 93; coordinating producer for ABC-TV's *Good Morning America*; executive producer at WJLA-TV in Washington, DC; and news producer at WBAL-TV in Baltimore and KDKA-TV in Pittsburgh.

Ms. Ford Williams' work was recognized with many awards throughout her career, including Emmy® Awards for *The Combat Zone*, produced for WJLA-TV in Washington, DC, WQED's "On Q Special Report: RX for a Healthier Community" and numerous Emmy nominations. She has been honored by the Easter Seals Society, International Association of Business Communicators, and the Pennsylvania Association of Broadcasters.

9:00PM: "UAV Research Projects"

Richard J. Dobson

Assistant Research Scientist at MTRI

Richard is an Assistant Research Scientist at Michigan Technical Research Institute (MTRI) with over five years experience applying Geographic Information System and Remote Sensing analysis for Environmental, Transportation, and Geologic projects.

Richard earned a BS (2007) in Earth Science and is expected to complete a MS in Environmental Science in April 2013. Richard has also developed 3DOBS (3D Optical Bridge-Evaluation System) for the evaluation of bridge deck surface conditions and is also the lead pilot for the MTRI's Unmanned Aerial Vehicle (UAV) on display in Ann Arbor this evening.
